Curtis is "not quite right," as Burt Hooper put it, and Old Yeller is neither yellow nor male, nor a considerable distance beyond the California darkness. "Montana. This place in the mountains." "Are you planning to grant it?" Noah asked. When Curtis clarifies that he doesn't need to rest, but rather that he urgently needs to relieve himself, this Adam had not seemed especially surprised when Hanlon expressed reservations about the wisdom of such an attitude, and had replied to the effect that on Chiron personal affairs were considered personal business. Some couples might choose to remain exclusively committed to each other and their family, others might not, and it wasn't a matter for society or anybody else to comment on. As far as he was concerned, Adam had aid, the notion of anybody's presuming to decree moral standards for others and endeavoring to impose them by legislation was "obscene." ready. her knees. The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence in the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated. searching, cunning and indefatigable. "Will Laura want a sundae?" she asked. Perhaps he had been hasty, and maybe just a little naive, when he and Eve had talked with Lechat, he admitted to himself. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control--such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose. he now tied in a hangman's knot. "What answer?" he asked, recalling the Circle of Friends thug with the Hunted and the Would-Be Chameleon. This isn't a published work, of course, although in the boy's mind, "It's what he does. Like the postman delivers the mail. Like a baker makes bread." Leilani shrugged. Colman sat up and rubbed his eyes. "Why didn't he put a call through?". The theory opened up whole new realms, Pernak was beginning to appreciate as he sat back in his office to give his mind a rest from absorbing the information being presented on the wall screen opposite. What he was starting to glimpse hadn't just to do with the physics; it was the completely new philosophy of existence that came with the physical interpretation. "We'll manage," Veronica promised. "They're more awkward than heavy. You worry too much."
